Education

Manipal University Jaipur B.Tech in Computer Science and Engineering	Jaipur, Rajasthan Oct 2021 - Jul 2025
Academic World School Senior School (12th Board) - 92.75%	Bemetara, Chhattisgarh Mar 2020 - Jul 2021
Academic World School Secondary School (10th Board) - 90.75%	Bemetara, Chhattisgarh Mar 2018 - May 2019

Skills

Languages & Frameworks: Python, SQL, FastAPI

Libraries & Databases: Matplotlib, NumPy, Pandas, Scikit-learn, Seaborn, requests, BeautifulSoup, MySQL, PostgreSQL

Cloud & Automation: Docker, Git, Jenkins (Basics), AWS

Experience

Data Science Intern | Celebal Technologies - On-Site Oct 2025 – Present

- Developed a Databricks-based contract intelligence system supporting large-scale document ingestion, metadata processing, and search pipelines.
- Implemented a 1-use-proof-of-concept for automated SAP invoice validation using AWS-based document ingestion, OCR, and structured data extraction.

AI Research Intern | Coding Jr – Remote Feb 2025 – Jun 2025

- Delivered backend features for 3+ AI copilot workflows, including code assistance and documentation querying.
- Conducted data research across 20+ unicorns, producing insights that shaped product roadmap priorities.

Projects

Contract Intelligence System (Databricks) | Python, Databricks, LLMs

- Processed 13 document waves with 200–500 contracts per wave, supporting scalable & repeatable contract ingestion.
- Designed and implemented a toggle-driven notebook with 1-configuration control to switch between testing and production runs.
- Persisted validated outputs into Delta tables across 3+ pipeline stages, avoiding repeated document parsing and LLM execution.

Automated SAP Invoice Validation (PoC) | Python, AWS

- Selected Amazon NovaAct (Preview) to build an autonomous browser-based workflow for SAP invoice validation.
- Built upstream pipelines using 6 AWS services (WorkMail, S3, Lambda, Textract, Bedrock, Novact) to extract and structure invoice data.
- Validated end-to-end automation across 4 stages: ingestion, OCR, structuring, and SAP execution.
- Reduced manual invoice validation steps by enabling 0-touch SAP interactions post-ingestion.

Crypto Matching Engine | Python, FastAPI, Pydantic, WebSocket, PyTest

- Built a real-time trading data pipeline handling 62K+ orders/sec with optimized concurrency.
- Designed 3 modular ETL flow for ingesting, validating, and streaming structured trade data.
- Automated performance and integrity checks using PyTest under synthetic load tests.

Extracurricular Activities

Skill Charge, Jaipur

- Co-founded a tech-driven educational startup with a team of 5+ members, leveraging advanced gamification techniques to enhance interactive and effective learning experiences.
- Secured top honors at The Startup Mela 2.0, Jaipur (2023).

Certifications

Design and Analysis of Algorithms – NPTEL; **CCNAv7: Enterprise Networking, Security, and Automation** – Cisco; **CCNAv7: Switching, Routing, and Wireless Essentials** – Cisco; **Getting Started with Enterprise-grade AI** – IBM; **Red Hat System Administration II (RH134)** – Red Hat; **Database Foundations** – Oracle Academy; **Tools for Data Science** – Coursera; **Python Essentials 1** – Cisco; **Fundamentals of Agents** – Hugging Face
