Experience

Software Engineer | Celebal Technologies - Jaipur Jun 2026 – Present

- Engineered a reusable **BFF authentication architecture** enabling **Microsoft Entra ID** users without native **Databricks** accounts to securely access Databricks Apps, while evolving the platform into a centralized App Center supporting minimal-configuration onboarding and workspace ribbon integration.
- Built **Pluto**, an **enterprise AI FinOps** agent that enables natural-language querying of cost, usage, forecasting, and optimization insights across **all Databricks workspaces**, powered by **Databricks system tables** with hourly refreshed analytics.
- Cut Pluto's maximum response time by 96% (from 236 sec to 8.6 sec)**, by materializing frequently queried views and engineering hourly data refresh pipelines, eliminating expensive runtime aggregations.
- Architecting enterprise **MCP security middleware** that **validates every tool request against organizational security policies before execution** while enforcing least-privilege access.
- Extended auditability across every **Databricks App** through **reusable middleware requiring minimal application changes**, automatically capturing user interaction data for monitoring, compliance, and operational insights.

Data Science Trainee | Celebal Technologies - Jaipur Feb 2026 – May 2026

- Removed LLM dependency as a point of failure and cost, **cutting execution latency by up to 46% and reducing LLM runtime cost to 0**, by replacing agentic decision loops with deterministic **Playwright DOM-based automation** connected to structured **Databricks job logs and Delta storage**.
- Benchmarked **fully LLM-driven, hybrid Playwright+LLM, and deterministic Playwright automation** strategies for **Oracle Transportation Management (OTM)**, comparing latency, reliability, hallucination risk, and operational cost to recommend the selector-based approach for production.
- Designed and deployed a toggle-driven notebook enabling 1-configuration control for test-to-production environment switching for Lexi**. Reduced deployment overhead while persisting validated outputs into Delta tables across **3+ pipeline stages** to avoid repeated document parsing.

Data Science Intern | Celebal Technologies - Jaipur Oct 2025 – Jan 2026

- Redesigned Lexi (production chatbot for querying enterprise contracts) document extraction pipeline, consolidating 3 separate manual notebooks into a single curated workflow processing 27 waves of 20–50 contracts each**. Implemented intelligent fallback: when **Databricks' ai_parse_document** missed content, the system detected gaps by page number, processed missed pages via **OCR**, and merged results, eliminating manual reprocessing cycles.
- Automated invoice validation end-to-end using Amazon NovaAct (Preview), building upstream pipelines across 6 AWS services (WorkMail, S3, Lambda, Textract, Bedrock, NovaAct)** to extract and structure invoice data across 4 stages (**ingestion, OCR, structuring, SAP execution**), achieving 0 manual intervention post-ingestion.

AI Research Intern | Coding Jr – Remote Feb 2025 – Jun 2025

- Built backend workflows for Coding Jr's VS Code extension AI copilot, enabling code rewriting, explanation, and test generation on selected code portions**. Delivered 3+ production features for code assistance and documentation querying, directly shaping product capabilities used by developers.

Skills

Programming & Frameworks: Python, SQL, FastAPI

AI & Agents: LLM Agents, Model Context Protocol (MCP), Claude Code, Codex, Playwright Automation

Libraries: Pandas, NumPy, Matplotlib, Seaborn, requests, BeautifulSoup

Cloud, Identity & MLOps: AWS, Databricks, Microsoft Entra ID, BFF Architecture, Docker, Jenkins (Basics)

Databases: MySQL, PostgreSQL

Education

Manipal University Jaipur Jaipur, Rajasthan

B.Tech in Computer Science and Engineering Oct 2021 - Jul 2025

Certifications

Design and Analysis of Algorithms – NPTEL; **CCNAv7: Enterprise Networking, Security, and Automation** – Cisco; **CCNAv7: Switching, Routing, and Wireless Essentials** – Cisco; **Getting Started with Enterprise-grade AI** – IBM; **Red Hat System Administration II (RH134)** – Red Hat; **Database Foundations** – Oracle Academy; **Tools for Data Science** – Coursera; **Python Essentials 1** – Cisco; **Fundamentals of Agents** – Hugging Face
